Planning & Development
Storm Water Division Special Flood Hazard**

"NO-RISE" CERTIFICATION

Community Name

Development Name

Stream Identification

Lot/Property Designation

FEMA/FIRM Map Number/Panel

Property owner

This is to certify that I am a duly qualified registered professional engineer licensed to practice in the State of Ohio.

Section 60.3 (d) (3) of the National Flood Insurance Program (NFIP) regulations: states that a community shall "prohibit encroachments, including fill, new construction, substantial improvements, and other development within the adopted regulatory floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the proposed encroachment would not result in any increase in flood levels within the community during the occurrence of the base (100-year) flood discharge."

It is further that I certify that the attached technical data supports the fact that proposed development, as listed above, will not impact the 100-year flood elevations, floodway elevations, or floodway widths within the stream identified, as listed above, at published sections in the Flood Insurance Study for Hamilton County, Ohio and will not impact the 100-year flood elevations, floodway elevations, or floodway widths at unpublished cross-sections in the vicinity of the proposed development.

Attached are the following documents that support my findings (If applicable):
